

ReorderByClass Documentation

Description: Reorder the columns in a dataset and cls file by class **Author:** Joshua Gould (Broad Institute), gp-help@broadinstitute.org

Summary:

Reorders a data file and a class file so that all samples of the same class occur together.

Parameters:

Name	Description
dataset.filename:	Datasetres, .gct, .odf
class.filename	Class filecls
dataset.file.output.name	Name of dataset output file
class.file.output.name	Name of class output file

Output Files:

1. Data file, the reordered dataset file

2. Class file, the reordered cls file

Platform Dependencies

Module type: Preprocess & Utilities

CPU type: any os:

Language: Java (minimum version 1.4)
